

Project Proposal

Research Question

What is the environmental impact of transporting oil out of the Uintah Basin?

Relevance

Why is this important?

Transportation emissions are bad for the environment

Utah has bad air quality

Literature Review

What has already been done?

Other places besides Uintah Basin

Utah and Uintah Basin

Something like my question hasn't been studied for the Uintah Basin

Methodology

What methods and data will I use to address the question?

Conclusion

Because of the lack of research on this specific topic, the project should be done.

```
x = c(1,2,3,4,5)
y = c(9,4,1,4,9)

plot(x,y)
```

Example Code

Quarto enables you to weave together content and executable code into a finished document. To learn more about Quarto see <https://quarto.org>.

Running Code

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

```
1 + 1
```

[1] 2

You can add options to executable code like this

[1] 4

The `echo: false` option disables the printing of code (only output is displayed).
